Subject: Faxed flight plans

Maj Allen Reference our discussion regarding faxed VFR flight plans. Due to some errors, missing information, timing, controller confusion, etc. the Airfield is temporally suspending the faxing of any flight plans to airfield ops. Please have your operations personnel and flight instructors review all flight plans for correctness and completeness and the use of the appropriate references for VFR flight planning. Please contact the operations officer or duty officer if you have any questions. This policy will stay in effect until VFR planning procedures are corrected to our mutual satisfaction. Additionally, IFR flight plans are not accepted over the facsimile machine . Please brief all your personnel and aircrews. Thank you for your cooperation. T. Lasser, LTC, (ret.)
